— A —

Abscisin,
effect on gibberellic acid stimulated enzyme synthesis in barley aleurone layer, *Chrispeels and Varner*, 1008

Abscission,
modification of, by UV-induced alteration in RNA and protein metabolism, *Klein and Edsall*, 461
role of RNA synthesis in, *Holm and Abeles*, 1094
the role of aging, *Abeles, Holm, and Gahagan*, 1351

Absorption,
of foliar-applied iron, *Eddings and Brown*, 15
of orthophosphate by excised corn roots, *Carter and Lathwell*, 1407
of sodium in bean and cotton, *Pearson*, 1171

Acer negundo,
control of cold hardiness in, *Irving and Lanphear*, 1191

Acetaldehyde dehydrogenase,
from peanut seeds, *Oppenheim and Castelfranco*, 125

Acetate,
photoassimilation of CO_2 and, by chloroplasts, *Everson and Gibbs*, 1153

Acetylene,
reduction of, by cell-free extracts of soybean root nodules, *Koch, Evans, and Russell*, 466

Acid fuchsin,
and calcium ascent in dogwood, *Thomas*, 1800

Adenosine triphosphatase: *see* Enzymes

(—)S-Adenosyl-L-methionine-magnesium protoporphyrin methyltransferase: *see* Enzymes

Adsorption,
of aromatic acids to oat monolayers, *Brian*, 1209

Aerobic conditions,
and basipetal polar transport of auxin, *Wilkins and Martin*, 831

Aflatoxin,
interaction of, with histones and DNA, *Black and Jirgensons*, 731

Airborne oxidants,
inactivation of cellulose synthesis in cell-free system by, *Ordin and Hall*, 205

Albizzia julibrissin,
phytochrome and nyctinastic leaf movement of, *Hillman and Koukkari*, 1413

Alfalfa,
soluble proteins in roots of, related to cold hardiness, *Gerloff, Stahmann, and Smith*, 895

Algae,
glycolate pathway in, *Hess and Tolbert*, 371

Allagochrome,
effect of light and substrate on levels in incubated sunflower leaf discs, *Habermann*, 1769

Amino acids,
gluconeogenesis from, in germinating castor bean, *Stewart and Beevers*, 1587
inactive and protein precursor pools of, in soybean hypocotyl, *Holleman and Key*, 29
ion of, from barley roots treated anaerobically and with metabolic inhibitors, *Hiatt and Lowe*, 1731

3-Amino-1,2,4-triazole,
inhibition of chloroplast ribosome formation by, *Bartels, Matsuda, Siegel, and Weier*, 736

Ammonium toxicity,
structure and function of tomato chloroplasts during, *Puritch and Barker*, 1229

Amylase *see also* Enzymes

α-Amylase,
gibberellic acid-enhanced synthesis and release of, by isolated barley aleurone layers, *Chrispeels and Varner*, 398
inhibition of gibberellin-activated synthesis of, *Yung and Mann*, 195

Amylopectin-like polysaccharide,
formation of, in potato tubers, *Frydman and Cardini*, 628

Anabaena cylindrica,
effects of sodium on nitrate assimilation and nitrogen fixation in, *Brownell and Nicholas*, 915

Anacystis nidulans,
dark CO_2 fixation by preilluminated, *Togasaki and Gibbs*, 991

Ankistrodesmus braunii,
effect of x-rays on ^{32}P and ^{14}C incorporation into photosynthetic products of, *Jeschke, Gimmler, and Simonis*, 380

Anthocyanin,
formation in response to ozone and smog treatment in *Rumex crispus, Koukol and Dugger, Jr.*, 1023

Apical dominance,
and auxin-gibberellin interaction, *Scott, Case, and Jacobs*, 1329

Apiose,
biosynthesis of, in *Lemna* and *Petroselinum, Roberts, Shah, and Loewus*, 659

Arachis hypogaea: see Peanut

Arginine,
biosynthesis of, in Paul's Scarlet Rose tissue culture, *Dougall and Fulton*, 387

Ascorbic acid,
balance and auxin-induced growth in excised tissues, *Lin and Key*, 742

ATP synthesis, acid induced,
localization of organic acids in, in chloroplasts, *Uribe and Jagendorf*, 697, 706

ATPase: *see* Enzymes

Atrazine metabolism,
and herbicidal selectivity, *Shimabukuro*, 1269

Autolysis,
of cell walls in vitro, *Lee, Kivilaan, and Bandurski*, 968

Auxin,
and ethylene in pollen-induced fading of orchid blossoms, *Burg and Dijkman*, 1648
and gibberellin interaction in pea stem elongation, *Ockerse and Galston*, 47
and kinetin action on RNA and protein synthesis in bean endocarp, *Sacher*, 1334
basipetal polar transport and aerobic metabolism, *Wilkins and Martin*, 831
inhibition of polar transport by ethylene, *Burg and Burg*, 1224
lateral transport of, in stems and roots, *Burg and Burg*, 891
movement of pulses of labeled, in corn coleoptiles, *Goldsmith*, 258
structure-activity relationship in, of mono-substituted phenylacetic acids, *Muir, Fujita, and Hansch*, 1519

Auxin protector substances,
distribution in *Pharbitis nil, Yoneda and Stonier,* 1017
Auxin synthesis,
effect of ethylene and gibberellic acid on, *Valdovinos, Ernest, and Henry,* 1803
Auxin transport,
effect of light on, in *Avena* coleoptile, *Thornton and Thimann,* 247
Avena sativa: see also Oat
effect of light on auxin transport in coleoptile of, *Thornton and Thimann,* 247
inhibition of cell elongation in coleoptile of, by hydroxyproline, *Cleland,* 271
Avena coleoptiles,
effect of inversion on growth and auxin movement in, *Little and Goldsmith,* 1239
geotropic response of, under anaerobic conditions, *Wilkins and Shaw,* 1111
inhibition of formation of protein-bound hydroxyproline by free hydroxyproline in, *Cleland,* 1165
reversal of hydroxyproline-induced inhibition of elongation of, *Norris, Jr.,* 481
structure-activity relationship in auxin activity of mono-substituted phenylacetic acids, *Muir, Fujita, and Hansch,* 1519
Avocado,
oxidation of pyruvate and malate by mitochondria of, during climacteric cycle, *Lance, Hobson, Young, and Biale,* 471
phosphorylation during respiratory climacteric, *Young and Biale,* 1357

— B —

Barban,
inhibition of gibberellin-activated synthesis of α-amylase, *Yung and Mann,* 195
Barley,
gibberellic acid-enhanced synthesis and release of α-amylase and ribonuclease by aleurone layers of, *Chrispeels and Varner,* 398
inhibition of gibberellin-activated synthesis of α-amylase in, *Yung and Mann,* 195
interactive effects of CO_2 and O_2 in soil on growth of, *Geisler,* 305
light-induced synthesis of photosynthetic enzymes in leaves of, *Keller and Huffaker,* 1277
relationship of cell sap pH to organic acid change during ion uptake by roots of, *Hiatt,* 294
ribosomes from leaves of, changes during senescence, *Srivastava and Arglebe,* 1497
sodium adsorption by roots: mechanisms of transport, *Rains and Epstein,* 314, 319
Barley aleurone layers,
gibberellic acid and abscisin on enzyme synthesis in, *Chrispeels and Varner,* 1008
gibberellic acid-induced protease synthesis by, *Jacobsen and Varner,* 1596
Barley embryos,
release of gibberellin-like substances by germinating, *Cohen and Paleg,* 1288
Barley endosperm,
bioassay for gibberellins, *Coombe, Cohen, and Paleg,* 105, 113
recovery of gibberellic acid following incubation with, *Paleg and Coombe,* 445
Barley roots,
loss of anions and cations from, treated anaerobically and with metabolic inhibitors, *Hiatt and Lowe,* 1731
Bean: *see also Phaseolus vulgaris*
absorption and translocation of sodium in, *Pearson,* 1171
control of chlorophyll formation in leaves of, *Gassman and Bogorad,* 774
effect of chloramphenicol on chlorophyll synthesis in leaves of, *Margulies,* 218
formation of amylase in disks of hypocotyl of, *Clum,* 568
growth and respiration of fruits, *Watada and Morris,* 757
kinetin and auxin action on RNA and protein synthesis in endocarp of, *Sacher,* 1334
modification of abscission by UV-induced alteration in RNA and protein metabolism, *Klein and Edsall,* 461
orotidine-5′-phosphate decarboxylase and pyrophosphorylase of leaves of, *Wolcott and Ross,* 275
polar transport related to mobilization in, *Zaeri and Mitchell,* 863
protein synthesis by developing plastids of, *Parenti and Margulies,* 1179
protochlorophyllide regeneration in leaves of, *Gassman and Bogorad,* 781
role of aging in abscission, *Abeles, Holm, and Gahagan,* 1351
role of RNA synthesis in abscission in, *Holm and Abeles,* 1094
Bean leaf discs,
regulation of senescence of, by light and growth regulators, *Goldthwaite and Laetsch,* 1757
Beet,
activation of protein synthesis by microsomes from aging, *Ellis and MacDonald,* 1297
Beta vulgaris: *see* Sugar beet
Biliproteins,
immunochemistry of, *Berns,* 1569
Blue light,
photosynthesis by algae in, *Hess and Tolbert,* 1123
Boron,
tolerance in *Penicillium notatum, Roberts and Siegel,* 1215
Brassica campestris: see Rape
Brassica oleracea var. *botrytis: see* Cauliflower
Bryophyllum tubiflorum,
temperature feature of enzymes affecting Crassulacean acid metabolism in, *Brandon,* 977
Buckwheat,
effects of oxygen concentration on levels of respiratory intermediates in, *Effer and Ranson,* 1053
respiratory metabolism in seedlings of, *Effer and Ranson,* 1042

— C —

Calcium,
and dye ascent in dogwood, *Thomas,* 1800
and strontium transport rates in maize roots, *Hutchin and Vaughan,* 644
inhibition of potassium absorption in corn roots by, *Elzam and Hodges,* 1483
Calcium-mediated apparent ion selectivity,
localization of, in corn-sectional volume of soybean roots, *Leggett and Gilbert,* 1658

Cantaloupe,
effect of ethylene on permeability of tissues of, *Von Abrams and Pratt*, 299
Carbohydrate,
metabolism during germination of uredospores of *Puccinia graminis* tritici, *Daly, Knoche, and Wiese*, 1633
Carbon-14,
effect of moisture supply upon translocation and storage of, in sugarcane, *Hartt*, 338
effect of x-rays on incorporation of, into photosynthetic products of *Ankistrodesmus braunii*, *Jeschke, Gimmler, and Simonis*, 380
Carbon dioxide,
and oxygen in soil, interactive effects of, on growth of barley and peas, *Geisler*, 305
and reduction of indophenol and ferricyanide by chloroplasts, *West and Hill*, 819
production by dry grain of *Zea mays*, *Bartholomew and Loomis*, 120
Carbon dioxide fixation,
in dark by preilluminated *Chlorella pyrenoidosa* and *Anacystis nidulans*, *Togasaki and Gibbs*, 991
in *Rhodospirillum rubrum*, *Anderson and Fuller*, 487, 491
Carbon dioxide permeability,
of plastic films, *Woolley*, 641
^{14}Carbon sucrose,
translocation of, in sugar beet in darkness, *Geiger and Batey*, 1743
^{14}Carbon-sucrose uptake,
phytochrome controlled: effect of gibberellic acid, *Goren and Galston*, 1087
Carrot,
distribution of indoleacetic-acid-oxidase inhibitor in storage root of, *Jacobson and Caplin*, 578
high phytochrome levels in cultured tissue of, *Wetherell and Koukkari*, 302
Castor bean,
gluconeogenesis from amino acids in germinating, *Stewart and Beevers*, 1587
uptake and translocation of sugar in seedlings of, *Kriedemann and Beevers*, 161, 174
Cauliflower,
purification of serine transhydroxymethylase of, *Mazelis and Liu*, 1763
Cell elongation,
inhibition of, in *Avena* coleoptile by hydroxyproline, *Cleland*, 271
role of hydroxyproline-protein in cessation of, *Cleland and Karlsnes*, 669
Cell sap pH,
relationship of, to organic acid change during ion uptake, *Hiatt*, 294
Cell wall,
in vitro autolysis of, *Lee, Kivilaan, and Bandurski*, 968
Cell wall extensibility,
inhibition of, by actinomycin D, *Coartney, Morre, and Key*, 434
Cell wall polysaccharides,
specific nature of, *Nevins, English, and Albersheim*, 900
Cellulase: *see* Enzymes
Cellulose synthesis,
by a cell-free system, inactivation by airborne oxidants, *Ordin and Hall*, 205
Cercidium floridum,
photosynthesis in, *Adams, Strain, and Ting*, 1797
Chilling,
periods of sensitivity to, in germinating cotton, *Christiansen*, 431
Chlamydomonas reinhardi,
ESR study of manganese in, *Teichler-Zallen and Levine*, 1643
impaired photosynthesis in mutants detected by increased fluorescence, *Bennoun and Levine*, 1284
photophosphorylation by a mutant deficient in P700, *Givan and Levine*, 1264
responses of mutant, to prolonged organotrophic growth, *Hudock and Bart*, 186
Chlamydomonas reinhardi, yellow-in-the-dark mutant,
low energy effects of light on growth and pigment content in, *Terborgh, Ladd, and McLeod*, 1665
Chlamydomonas reinhardtii,
photosynthesis by, in blue light, *Hess and Tolbert*, 1123
Chloramphenicol,
effect on chlorophyll synthesis of bean leaves, *Margulies*, 218
Chlorella ellipsoidea,
fucosterol reduction to clionasterol by, *Patterson and Karlander*, 1651
Chlorella protothecoides,
α-linolenate and photosynthetic activity in, *Katayama and Benson*, 308
Chlorella pyrenoidosa,
accumulation of rubidium, potassium, and sodium, *Schaedle and Jacobson*, 953
dark CO_2 fixation by preilluminated, *Togasaki and Gibbs*, 991
enhancement of photosynthesis in, by alternated light beams, *Eley and Myers*, 598
photosynthesis by, in blue light, *Hess and Tolbert*, 1123
Chlorella vulgaris,
action spectrum of light-enhanced respiration in, *Kowallik*, 672
sterols in, *Patterson*, 1457
Chloride,
ion of, from barley roots treated anaerobically and with metabolic inhibitors, *Hiatt and Lowe*, 1731
Chlorogenic acid,
effect of light and substrate on levels in incubated sunflower leaf discs, *Habermann*, 1769
Chlorophyll,
control of formation of, *Gassman and Bogorad*, 774
effect of chloramphenicol on synthesis of, in bean leaves, *Margulies*, 218
Chlorophyll a/b ratio,
changes in, in algae grown in blue or red light, *Hess and Tolbert*, 1123
Chlorophyll formation,
and photosynthetic competence in *Euglena* in presence of DCMU during chloroplast development, *Schiff, Zeldin, and Rubman*, 1716
Chlorophyll synthesis,
interaction of temperature and light in, in corn, *McWilliam and Naylor*, 1711
Chloroplast(s),
analysis of plastoquinones A, B, C, and D from, *Barr, Henninger, and Crane*, 1246
biosynthesis of starch in, *Nomura, Nakayama, Murata, and Akazawa*, 327

carbon dioxide and reduction of indophenol and ferricyanide in, *West and Hill*, 819
evidence for light-induced changes in structure of, in vivo, *Packer, Barnard, and Deamer*, 283
inhibition of cyclic photophosphorylation in, by peroxyacetyl nitrate, *Koukol, Dugger, Jr., and Palmer*, 1419
inhibition of electron transport in, by phenol, *Neumann and Drechsler*, 573
integrity and ATP-dependent CO_2 fixation, *Johnson and Bruff*, 1321
manganese in, *Homann*, 997
organic acids in acid-induced ATP synthesis in, *Uribe and Jagendorf*, 697, 706
photoreduction sites for 2,6-dichlorophenolindophenol in, *Ke*, 1310
photosynthetic assimilation of CO_2 and acetate by, *Everson and Gibbs*, 1153
photosynthetic reactions by, with unusual structures, *Homann and Schmid*, 1619
structure and function during ammonium toxicity, *Puritch and Barker*, 1229
sucrose synthesis in, *Everson, Cockburn, and Gibbs*, 840
technique for isolating, with high rates of photophosphorylation, *Nobel*, 1389
uncoupling of photophosphorylation by freezing in, *Heber*, 1343

Chloroplast development,
chlorophyll formation and photosynthetic competence during light-induced, in *Euglena* in presence of DCMU, *Schiff, Zeldin, and Rubman*, 1716
RNA metabolism during, in *Euglena gracilis, Zeldin and Schiff*, 922

Circadian rhythm,
effect of light on, in *Neurospora crassa, Sargent and Briggs*, 1504

Citrullus vulgaris: *see* Watermelon

Citrus tree wood,
thermal conductivity of, *Turrell, Austin, McNee, and Park*, 1025

Clionasterol,
from fucosterol in *Chlorella ellipsoidea, Patterson and Karlander*, 1651

Clock resetting,
in flowering of cocklebur, *Papenfuss and Salisbury*, 1562

CO_2,
photosynthetic assimilation of acetate and, by chloroplasts, *Everson and Gibbs*, 1153

CO_2 evolution,
metabolic inhibitors and, in light and dark, *Poskuta, Nelson, and Krotkov*, 1187

CO_2-fixation,
and chloroplast integrity, *Johnson and Bruff*, 1321

$^{14}CO_2$ fixation products,
changes in, in algae grown in blue or red light, *Hess and Tolbert*, 1123

CO_2 metabolism in corn roots,
intracellular distribution of enzymes, *Danner and Ting*, 719
kinetics of carboxylation and decarboxylation, *Ting and Dugger, Jr.*, 712

Cobalt,
translocation in tomato, *Tiffin*, 1427

Cocklebur,
clock resetting in flowering of, *Papenfuss and Salisbury*, 1562
control of flowering by red and far-red light, *Reid, Moore, and Hamner*, 503
flowering responses of, to long dark periods, *Moore, Reid, and Hamner*, 503
^{3}H-thymidine incorporation into nuclear DNA of leaf cells of, *Maksymowych, Devlin, Blum, and Wochok*, 814
inhibition of flowering in, by ethylene, *Abeles*, 608
inhibition of flowering of, by prolonged irradiation with far red, *Mancinelli and Downs*, 95

Coconut water,
purification of a nodulation factor from, *Schaffer and Alexander*, 563

Cold hardiness,
control of, in woody plants, *Irving and Lanphear*, 1191
in alfalfa, related soluble proteins, *Gerloff, Stahmann, and Smith*, 895
influence of purines and pyrimidines on, changes in soluble protein, nucleic acid, and tissue pH, *Jung, Shih, and Shelton*, 1653
light stimulation of, a translocatable promoter, *Steponkus and Lanphear*, 1673

Cold hardiness inhibitors,
long day leaf as a source of, *Irving and Lanphear*, 1384

Cold injury,
refinement of triphenyl tetrazolium chloride method for determining, *Steponkus and Lanphear*, 1423

Compartmentation,
of exogenously supplied organic acids in corn roots, *Steer and Beevers*, 1197

Conidiation,
effect of light on circadian rhythm of, in *Neurospora crassa, Sargent and Briggs*, 1504

Convection,
and heat transfer from plants, *Idso and Baker*, 631

Corn: *see also* Maize *and Zea mays*
CO_2 metabolism in roots of, *Danner and Ting*, 719
CO_2 metabolism in roots of, *Ting and Dugger, Jr.*, 712
compartmentation of exogenously supplied organic acids in roots of, *Steer and Beevers*, 1197
diffusive resistances at, and transpiration rates from leaves in situ within a crop, *Impens, Stewart, Allen, Jr., and Lemon*, 99
early effect of light on enzymes in leaves of, *Chen, McMahon, and Bogorad*, 1
effect of simazine on nitrate reductase activity in, *Tweedy and Ries*, 280
interaction of temperature and light in chlorophyll synthesis in, *McWilliam and Naylor*, 1711
intracellular localization of nitrate reductase, nitrite reductase, and glutamic acid dehydrogenase in leaf of, *Ritenour, Joy, Bunning, and Hageman*, 233
movement of auxin in coleoptiles of, *Goldsmith*, 258
polar transport in isolated root segments of, *Vaughan, Evans, and Hutchin*, 747
radial salt transport in roots, *Yu and Kramer*, 985
regulation of nitrate reductase activity in, by endogenous metabolites, *Schrader and Hageman*, 1750
uncoupling of energy-linked functions of mitochondria of, *Baddeley and Hanson*, 1702

Corn roots,
calcium inhibition of potassium absorption in, *Elzam and Hodges*, 1483

orthophosphate absorption by excised, *Carter and Lathwell,* 1407
Cornus florida: see Dogwood
Corynebacterium sepedonicum,
a phytotoxic polysaccharide from, *Strobel,* 1433
Cotton,
absorption and translocation of sodium in, *Pearson,* 1171
periods of sensitivity to chilling in germinating, *Christiansen,* 431
photosynthesis, transpiration, leaf temperature, and stomatal activity of, under varying water potential, *Pallas, Michel, and Harris,* 76
Crassulacean acid metabolism,
temperature features of enzymes affecting, *Brandon,* 977
Cucumber,
conversion of indole-3-ethanol to indole-3-acetic acid in seedlings of, *Rayle and Purves,* 1091
growth retardant and hormone interactions on elongation of hypocotyl of, *Moore,* 677
isolation of indole-3-ethanol from, *Rayle and Purves,* 520
prolonged far red irradiation on germination of seed of, *Yaniv, Mancinelli, and Smith,* 1479
Cucumis melo: see Cantaloupe
Cucumis sativus see Cucumber
Cucurbita melopepo,
effects of temperature change on translocation in, *Webb,* 881
Cucurbita moscata: see Squash
Cytochromes,
during biogenesis of mitochondria in germinating peanut cotyledons, *Breidenbach, Castelfranco, and Criddle,* 1035
Cytokinin,
activity in root exudate of *Vitis vinifera, Skene and Kerridge,* 1131

— D —

Daucus carota: see Carrot
Deformation, irreversible,
nature of, in cells of mung bean hypocotyls, *Lockhart,* 1545
Dendrophthoe falcata,
phosphate fractions in the leaves of, and its hosts, *Prakash, Krishnam, and Tewari,* 347
2′-Deoxyadenosine,
effect on thymidine utilization by pollen grains, *Takats,* 907
Desoxygibberellin C,
its effects on growth, *Hashimoto, Tamura, Mori, and Matsui,* 886
Desoxygibberellin C methyl ester,
its effect on growth, *Hashimoto, Tamura, Mori, and Matsui,* 886
2,6-Dichlorophenolindophenol,
photoreduction sites for, in chloroplasts, *Ke,* 1310
3(3,4-Dichlorophenyl) 1,1-dimethyl urea,
chlorophyll formation and photosynthetic competence during chloroplast development in *Euglena* in presence of, *Schiff, Zeldin, and Rubman,* 1716
Diffusive resistances,
at leaves in situ within the vegetative canopy of a corn crop, *Impens, Stewart, Allen, Jr., and Lemon,* 99
DNA,
^{3}H-thymidine into nuclear, of leaf cells, *Maksymowych, Devlin, Blum, and Wochok,* 814
interaction with aflatoxin, *Black and Jirgensons,* 731
DNA hybridization,
measuring relatedness among plants, *Bendich and Bolton,* 959
DNA, mitochondrial,
changes during biogenesis of mitochondria in germinating peanut cotyledons, *Breidenbach, Castelfranco, and Criddle,* 1035
Dock: *see Rumex crispus*
Dogwood,
dye and calcium ascent in, *Thomas,* 1800
Dormancy,
induction of, by patulin, *Berrie, Hendrie, Parker, and Knights,* 889

— E —

Electron transport,
photo-induced inhibition of, by phenol, *Neumann and Drechsler,* 573
Elongation,
of tomato root tips, effects of N-bases and boron on, *Johnson and Albert,* 1307
P-Enolpyruvate carboxylase: *see* Enzymes
Enzyme(s),
activities of respiratory, from *Verticillium albo-atrum* conidia, *Throneberry,* 1472
adenosine triphosphatase in loblolly pine seedling root tip, *McClurkin and McClurkin,* 1103
S-adenosyl-L-methionine-magnesium protoporphyrin methyltransferase in *Zea mays, Radmer and Bogorad,* 463
amylase formation in bean hypocotyl disks, *Clum,* 568
ATPase activity and tendril coiling, *Jaffe and Galston,* 845
cellulase synthesis in pea epicotyls in response to indoleacetic acid, *Fan and Maclachlan,* 1114
effect of light on, of corn leaves, *Chen, McMahon, and Bogorad,* 1
gibberellic acid and abscisin on synthesis of, in barley aleurone layers, *Chrispeels and Varner,* 1008
gibberellic acid-induced protease synthesis in barley aleurone layers, *Jacobsen and Varner,* 1596
hormonal control of proteinase activity, *Penner and Ashton,* 791
intracellular distribution of malic dehydrogenase in corn roots, *Danner and Ting,* 719
intracellular distribution of P-enolpyruvate carboxylase in corn roots, *Danner and Ting,* 719
intracellular distribution of p-nitrophenyl-phosphatase, *Corbett and Price,* 827
isolation and properties of the system forming indoleacetic acid, *Lantican and Muir,* 1158
light-induced synthesis of ribulose-1,5-diP carboxylase and phosphoribulokinase in greening barley leaves, *Keller and Huffaker,* 1277
3-methyleneoxindole reductase of peas, *Moyed and Williamson,* 510

mevalonic acid kinase in *Euglena gracilis*, *Cooper and Benedict*, 515
orotidine-5′-phosphate decarboxylase and pyrophosphorylase of bean leaves, *Wolcott and Ross*, 275
regulation of nitrate reductase activity in corn seedlings by endogenous metabolites, *Schrader and Hageman*, 1750
serine transhydroxymethylase of cauliflower: partial purification and properties, *Mazelis and Liu*, 1763
sulphite reductase location in plant tissues, *Mayer*, 324
temperature features of, affecting Crassulacean acid metabolism, *Brandon*, 977

ESR study,
of manganese in *Chlamydomonas reinhardi*, *Teichler-Zallen and Levine*, 1643

Ethylene,
and auxin in pollen-induced fading of orchid blossoms, *Burg and Dijkman*, 1648
and gibberellin, opposing effects of, *Scott and Leopold*, 1021
effect of light on production of, by pea plumules, *Goeschl, Pratt, and Bonner*, 1077
effect of, on auxin synthesis, *Valdovinos, Ernest, and Henry*, 1803
effect on permeability of cantaloupe tissue, *Von Abrams and Pratt*, 299
inhibition of flowering in *Xanthium pensylvanicum*, by, *Abeles*, 608
inhibition of polar auxin transport by, *Burg and Burg*, 1224
molecular requirements for activity of, *Burg and Burg*, 144

Euglena gracilis,
chlorophyll formation and photosynthetic competence during chloroplast development in presence of DCMU, *Schiff, Zeldin, and Rubman*, 1716
mevalonic acid kinase in, *Cooper and Benedict*, 515
RNA metabolism during chloroplast development in, *Zeldin and Schiff*, 922

Exudation,
in detopped tobacco, day-night periodicity of, *Wallace, Ashcroft, and Lunt*, 238

— F —

Fagopyrum esculentum: *see* Buckwheat

Far red irradiation,
inhibition of flowering of cocklebur by prolonged, *Mancinelli and Downs*, 95
on germination of seeds, *Yaniv, Mancinelli, and Smith*, 1479

Fatty acid synthetase,
development of, as function of protein synthesis in aging potato tuber slices, *Willemot and Stumpf*, 391

Ferricyanide reduction,
carbon dioxide and, by chloroplasts, *West and Hill*, 819

Flavonoids,
and contact coiling of tendrils, *Jaffe and Galston*, 848

Floral inhibition,
of soybean during a 72-hour cycle, *Shumate, Reid, and Hamner*, 1511

Flowering,
control of, by red and far-red light, *Reid, Moore, and Hamner*, 532
in *Proserpinaca palustris*, *Davis*, 667
inhibition of, by ethylene, *Abeles*, 608
inhibition of, of cocklebur by prolonged irradiation with far red, *Mancinelli and Downs*, 95
of cocklebur, aspects of clock resetting, *Papenfuss and Salisbury*, 1562
of *Hyoscyamus niger*, endogenous rhythm in photoperiodic response, *Hsu and Hamner*, 725
of *Xanthium pensylvanicum* in long dark periods, *Moore, Reid, and Hamner*, 503

Flowering responses,
of *Lemna gibba* G3, *Cleland and Briggs*, 1553
of *Xanthium pensylvanicum* to long dark periods, *Moore, Reid, and Hamner*, 503
of *Xanthium pensylvanicum* to red and far-red light, *Reid, Moore, and Hamner*, 532

Foxtail,
intracellular localization of nitrate reductase, nitrite reductase and glutamic acid dehydrogenase in leaf of, *Ritenour, Joy, Bunning, and Hageman*, 233

Fraxinus ornus,
germination of excised embryos with phleomycin, *Tepper, Hollis, Galson, and Sondheimer*, 1493

Freezing,
of xylem sap without cavitation, *Hammel*, 55
uncoupling of photophosphorylation by, *Heber*, 1343

Fucosterol,
reduction to clionasterol in vivo by *Chlorella ellipsoidea*, *Patterson and Karlander*, 1651

— G —

Geotropic response,
of coleoptiles under anaerobic conditions, *Wilkins and Shaw*, 1111

Germination,
changes in P_{FR} requirement for, of tomato seeds, *Yaniv and Mancinelli*, 1147
interactions between hydrostatic pressure and oxygen on, of lettuce seeds, *Vidaver and Lue-Kim*, 243
of excised *Fraxinus ornus* embryos with phleomycin, *Tepper, Hollis, Galson, and Sondheimer*, 1493
of rice, metabolic poisons on, *Siegel, Lederman, Daly, and Roberts*, 1489
of uredospores of *Puccinia graminis* tritici, carbohydrate and lipid metabolism during, *Daly, Knoche, and Weise*, 1633
temperature dependence and P_{FR} levels in, of tomato, *Mancinelli, Yaniv, and Smith*, 333

Gibberellic acid,
and desoxygibberellin C upon growth, *Hashimoto, Tamura, Mori, and Matsui*, 886
effect of, on auxin synthesis, *Valdovinos, Ernest, and Henry*, 1803
effect on enzyme synthesis in barley aleurone layers, *Chrispeels and Varner*, 1008
effect on phytochrome controlled ^{14}C-sucrose uptake, *Goren and Galston*, 1087
effect on protein and soluble nitrogen in lettuce seeds, *Rai and Laloraya*, 440

enhancement of α-amylase and ribonuclease synthesis and release from isolated barley aleurone layers by, *Chrispeels and Varner*, 398
induction of protease synthesis by isolated barley aleurone layers, *Jacobsen and Varner*, 1596
recovery following incubation with barley endosperm, *Paleg and Coombe*, 445
Gibberellin(s),
-activated synthesis of α-amylase, inhibition by barban, *Yung and Mann*, 195
and auxin interaction in pea stem elongation, *Ockerse and Galston*, 47
and ethylene, opposing effects of, *Scott and Leopold*, 1021
and indoleacetic acid interaction in apical dominance, *Scott, Case, and Jacobs*, 1329
barley endosperm bioassay for, *Coombe, Cohen, and Paleg*, 105, 113
Gibberellin-like substances,
release of, by germinating barley embryos, *Cohen and Paleg*, 1288
Gluconeogenesis,
from amino acids in germinating castor bean, *Stewart and Beevers*, 1587
Glutamic acid dehydrogenase,
intracellular localization of, in green leaf tissue, *Ritenour, Joy, Bunning, and Hageman*, 233
Glycine max: *see* Soybean
Glycolate,
pathway in algae, *Hess and Tolbert*, 371
Glycolic acid oxidase system,
high activity in tobacco leaves, *Moss*, 1463
Gossypium hirsutum: *see* Cotton
Gravitational compensation,
and phototropic response of oat coleoptile, *Shen-Miller and Gordon*, 352
Gravity effects,
rotation axes for analysis of, *Lyon*, 875
Gravity stimulus nullification,
causal basis of, *Dedolph, Oenick, Wilson, and Smith*, 1373
Growth,
auxin-induced and oxidation-reduction balance of ascorbic acid, *Lin and Key*, 742
effect of antimetabolites and inhibitors on, of *Sordaria fimicola*, *Lindenmayer and Schoen*, 1059
effect of inversion on, in coleoptiles, *Little and Goldsmith*, 1239
inhibition of, by actinomycin D, *Coartney, Morre, and Key*, 434
interactive effects of CO_2 and O_2 in soil on, of barley and peas, *Geisler*, 305
of *Chlamydomonas reinhardi* mutant y-2, low energy light effects on, *Terborgh, Ladd, and McLeod*, 1665
of mutant strain of *Chlamydomonas reinhardi*, *Hudock and Bart*, 186
of pea plumules, effect of light on, *Goeschl, Pratt, and Bonner*, 1077
of salt-habituated *Penicillium notatum* in salt-free media, *Siegel, Roberts, Lederman, and Daly*, 201
of seedling *Zea mays* and its relationship to respiration during imbibition, *Woodstock and Grabe*, 1071
patterns of bean fruits, *Watada and Morris*, 757
Growth regulators,
adsorption of aromatic acids to oat monolayers, *Brian*, 1209
and proteinase activity, *Penner and Ashton*, 791
Growth retardant,
and hormone interactions on cucumber hypocotyl elongation, *Moore*, 677

— H —

Haplopappus heterophyllus,
time course of steroid biosynthesis and metabolism in, *Bennett, Lieber, and Heftmann*, 973
Heat transfer,
from a leaf, *Linacre*, 651
from plants, importance of reradiation, convection, and translocation on, *Idso and Baker*, 631
Hedera helix,
light stimulus of cold acclimation, a translocatable promoter, *Steponkus and Lanphear*, 1673
Helianthus tuberosus: *see* Jerusalem artichoke
Hemlock,
freezing of xylem sap without cavitation, *Hammel*, 55
Histones,
interaction with aflatoxin, *Black and Jirgensons*, 731
Hordeum vulgare: *see* Barley
Hormone,
and growth retardant interactions on cucumber hypocotyl elongations, *Moore*, 677
Hydrostatic pressure,
and oxygen concentration interaction on germination of lettuce seeds, *Vidaver and Lue-Kim*, 243
3-Hydroxymethyloxindole,
as a metabolite in pea seedlings, *Tuli and Moyed*, 425
Hydroxyproline,
-induced inhibition of elongation of *Avena* coleoptiles, reversal of, *Norris, Jr.*, 481
inhibition of cell elongation in *Avena* coleoptile by, *Cleland*, 271
inhibition of formation of protein-bound hydroxyproline by free, *Cleland*, 1165
Hydroxyproline-proteins,
role in cessation of cell elongation, *Cleland and Karlsnes*, 669
Hyoscyamus niger,
endogenous rhythm in photoperiodic response of, *Hsu and Hamner*, 725

— I —

Ice,
electron microscope study of, in rapidly cooled cortical cells, *Sakai and Otsuka*, 1680
Imbibition,
respiration during, and relationship to subsequent seedling growth in *Zea mays*, *Woodstock and Grabe*, 1071
Indole-acetic acid,
infra-red spectra of microgram quantities of, *Powell*, 1460
Indole-3-acetic acid,
conversion of indole-3-ethanol in, *Rayle and Purves*, 1091
effect of inversion on movement of, in coleoptiles, *Little and Goldsmith*, 1239
in *Schizophyllum commune*, *Epstein and Miles*, 911
inhibition of root growth by, *Chadwick and Burg*, 415

oxidation products of, in pea seedlings, *Tuli and Moyed*, 425
polar transport of, related to mobilization, *Zaerr and Mitchell*, 863
Indole-3-acetic acid-1′-^{14}C,
translocation in seedlings of *Phaseolus coccineus* and *Zea mays*, *Whitehouse and Zalik*, 1363
Indole-3-acetic acid oxidation products,
colorimetric determination of, *Meudt and Gaines*, 1395
Indole-3-ethanol,
conversion of, to indole-3-acetic acid in cucumber *Rayle and Purves*, 1091
from cucumber seedlings, *Rayle and Purves*, 520
Indoleacetic acid,
and gibberellin interaction in apical dominance, *Scott, Case, and Jacobs*, 1329
biosynthesis from tryptophan-^{14}C in cell-free extracts of pea shoot tips, *Moore and Shaner*, 1787
synthesis of, by a cell-free system from tobacco, *Phelps and Sequeira*, 1161
synthesis of RNA and cellulase in pea epicotyls in response to, *Fan and Maclachlan*, 1114
the enzyme system forming, from oat, *Lantican and Muir*, 1158
Indoleacetic acid-2-^{14}C,
influence of light on transport of, *Naqvi and Gordon*, 138
Indoleacetic acid-oxidase-inhibitor,
distribution of, in storage root of *Daucus carota*, *Jacobson and Caplin*, 578
3-Indolylacetic acid,
changes in protein synthesis induced by, *Patterson and Trewavas*, 1081
Indophenol reduction,
carbon dioxide and, by chloroplasts, *West and Hill*, 819
Infra-red spectra,
of microgram quantities of IAA, *Powell*, 1460
Interionic relationships,
in *Pinus elliottii*, *Dumbroff and Michel*, 1465
Inversion,
effect on growth and auxin movement in coleoptiles, *Little and Goldsmith*, 1239
Invertase,
development of activity of, in washed tissue slices, *Vaughan and MacDonald*, 456
Invertase inhibitor,
from potatoes; purification and characterization, *Pressey*, 1780
Ion,
contents and cell transmembrane electropotentials in pea and oat seedling tissue, *Higinbotham, Etherton, and Foster*, 37
Ion absorption,
dual mechanisms of, in maize seedlings, *Luttge and Laties*, 181
Ion uptake,
relationship of cell sap pH to organic acid change during, *Hiatt*, 294
Ionic balance,
between, and anions in tomato tissues, *Kirkby and Mengel*, 6
Iron,
absorption and translocation of foliar-applied, *Eddings and Brown*, 15
translocation in tomato, *Tiffin*, 1427
Isoperoxidases,
of pea, *Siegel and Galston*, 221
Isothiocyanates,
biosynthesis of, in rape, *Chisholm and Wetter*, 1726

— J —

Japanese Morning Glory: *see Pharbitis nil*
Jerusalem artichoke,
protein synthesis in discs and cell-free preparations of tubers of, *Chapman and Edelman*, 1140

— K —

(—)-Kaurene,
biosynthesis of, in cell-free starch of immature pea seeds, *Anderson and Moore*, 1527
Kinetin,
and auxin action on RNA and protein synthesis in bean endocarp, *Sacher*, 1334
and nitrogen changes in seedlings, *Banerji and Laloraya*, 623
and water and salt stress, effect on protein synthesis in tobacco leaves, *Ben-Zioni, Itai, and Vaadia*, 361
translocation of radioactive, *Lagerstedt and Langstrom*, 611

— L —

Lactuca sativa: *see* Lettuce
Leaf development,
in *Proserpinaca palustris*, *Davis*, 667
Leaf temperature,
of cotton plants under varying water potentials, *Pallas, Michel, and Harris*, 76
Leaf water potentials,
comparison of methods for measuring, *Knipling and Kramer*, 1315
measured with a pressure chamber, *Boyer*, 133
Lemna gibba,
biosynthesis of apiose in, *Roberts, Shah, and Loewus*, 659
Lemna gibba, G3,
flowering responses of, *Cleland and Briggs*, 1553
Lettuce,
effect of light and gibberellic acid on protein and nitrogen in seeds of, *Rai and Laloraya*, 440
induction of dormancy in, by pautlin, *Berrie, Hendrie, Parker, and Knights*, 889
interaction between hydrostatic pressure and oxygen on germination in seeds of, *Vidaver and Lue-Kim*, 243
Light,
and flowering response of *Xanthium pensylvanicum*, *Moore, Reid, and Hamner*, 503, 532
and metabolic inhibitors on CO_2 evolution, *Poskuta, Nelson, and Krotkov*, 1187
and temperature interaction in chlorophyll synthesis in corn, *McWilliam and Naylor*, 1711
effect of low energy on growth and pigment content in *Chlamydomonas reinhardi* mutant y-2, *Terborgh, Ladd, and McLeod*, 1665

effect of, on allagochrome and chlorogenic acid levels in incubated sunflower leaf discs, *Habermann*, 1769
effect of, on circadian rhythm of conidiation in *Neurospora crassa*, *Sargent and Briggs*, 1504
effect of, on production of ethylene by pea plumules, *Goeschl, Pratt, and Bonner*, 1077
effect on auxin transport in *Avena* coleoptile, *Thornton and Thimann*, 247
effect on enzymes of corn leaves, *Chen, McMahon, and Bogorad*, 1
effect on monoterpenes of peppermint, *Burbott and Loomis*, 20
effect on protein and nitrogen in lettuce seeds, *Rai and Laloraya*, 440
-enhanced respiration, action spectrum for, *Kowallik*, 672
influence of, on transport of indoleacetic acid-2-^{14}C, *Naqvi and Gordon*, 138
-induced changes in chloroplast structure in vivo, *Packer, Barnard, and Deamer*, 283
regulation of senescence of bean leaf discs by, *Goldthwaite and Laetsch*, 1757
stimulation of cold acclimation: a translocatable promoter, *Steponkus and Lanphear*, 1673

Lignin,
biosynthesis of, in *Sorghum vulgare*, *Stafford*, 450

Linoleic acid,
uncoupling of energy-linked functions of corn mitochondria by, *Baddeley and Hanson*, 1702

α-Linolenate,
and photosynthetic activity in *Chlorella prototheocoides*, *Katayama and Benson*, 308

Lipid,
metabolism during germination of uredospores of *Puccinia graminis* tritici, *Daly, Knoche, and Weise*, 1633

Lipoxidase,
effect of red and far-red light on, of squash seedlings, *Surrey*, 421

Loblolly pine,
adenosine triphosphatase in seedling roots of, *McClurkin and McClurkin*, 1103

Lycopersicon esculentum: *see* Tomato

—M—

Maize: *see also* Corn *and Zea mays*
dual mechanisms of absorption in seedlings of, *Luttge and Laties*, 181

Malate,
oxidation of, by mitochondria of avocado fruit during climacteric cycle, *Lance, Hobson, Young, and Biale*, 471

Malic dehydrogenase: *see* Enzymes

Malic enzyme: *see* Enzymes

Manganese,
ESR study of, in *Chlamydomonas reinhardi*, *Teicher-Zallen and Levine*, 1643
translocation in tomato, *Tiffin*, 1427
in chloroplasts, *Homann*, 997

Matric potentials,
of leaves, *Boyer*, 213

Medicago sativa,
cold hardiness in, *Jung, Shih, and Shelton*, 1653

Mentha piperita: *see* Peppermint

Mesotaenium caldariorum,
isolation of phytochrome from, *Taylor and Bonner*, 762

Metabolic poisons,
on germination of rice, *Siegal, Lederman, Daly, and Roberts*, 1489

Methanol,
incorporation into pectic substances of parsley leaves, *Roberts, Shah, Golebiewski, and Loewus*, 1737

3-Methyleneoxindole,
as a metabolite in pea seedlings, *Tuli and Moyed*, 425

3-Methyleneoxindole reductase: *see* Enzymes

Mevalonic acid kinase: *see* Enzymes

Microsomes,
activation of protein synthesis by, from aging beet disks, *Ellis and MacDonald*, 1297

Mitochondria,
association with peroxidase in plants, *Plesnicar, Bonner, Jr., and Storey*, 366
biogenesis of, in germinating peanut cotyledons, *Breidenbach, Castelfranco, and Criddle*, 1035
effects of inhibitors on respiration of, *Ikuma and Bonner, Jr.*, 1400
effects of respiratory inhibitors on, of mung bean, *Ikuma and Bonner, Jr.*, 1535
inhibition of oxidative phosphorylation and respiration by ozone in, *Lee*, 691
isolation and characteristics of tightly-coupled, from mung bean hypocotyls, *Ikuma and Bonner, Jr.*, 67
oxidation of pyruvate and malate by, from avocado fruit during climacteric cycle, *Lance, Hobson, Young, and Biale*, 471
oxidative phosphorylation of, from NaCl-treated pea seedlings, *Livne and Levin*, 407
uncoupling of energy-linked functions of, from corn, *Baddeley and Hanson*, 1702

Monochromatic sources,
of equal intensities, *Poff and Norris*, 1155

Monomethyldecenylsuccinic acid,
uncoupling of energy-linked functions of corn mitochondria by, *Baddeley and Hanson*, 1702

Mono-substituted phenylacetic acids,
structure-activity relationship of auxin activity of, *Muir, Fujita, and Hansch*, 1519

Monoterpenes,
effects of light and temperature on, of peppermint, *Burbott and Loomis*, 20

Morus bombycis: *see* Mulberry

Mulberry,
cortical cells, effects of cooling and rewarming rates on survival at low temperature, *Sakai and Yoshida*, 1695
electron microscope study of ice in rapidly cooled cortical cells, *Sakai and Otsuka*, 1680

Mung bean,
alkali-insoluble polysaccharide production by particulate enzyme preparation from, *Villemez, Jr., Franz, and Hassid*, 1219
effects of inhibitors on respiration of mitochondria from, *Ikuma and Bonner, Jr.*, 1400
effects of respiratory inhibitors on mitochondria of, *Ikuma and Bonner, Jr.*, 1535
isolation and characteristics of tightly-coupled mitochondria from hypocotyls, *Ikuma and Bonner*, 67
nature of irreversible deformation in hypocotyl cells of, *Lockhart*, 1545

— N —

Navicula pelliculosa,
composition of, during silicon-starvation synchrony, *Coombs, Darley, Holm-Hansen, and Volcani*, 1601
photosynthesis and respiration of, during silicon-starvation synchrony, *Coombs, Spanis, and Volcani*, 1607
Neurospora crassa,
effects of light on circadian rhythm of conidiation of, *Sargent and Briggs*, 1504
Nicotiana rustica: *see* Tobacco
Nicotiana tabacum: *see* Tobacco
Nitrate assimilation,
effect of sodium on, in *Anabaena cylindrica*, *Brownell and Nicholas*, 915
Nitrate reductase: *see also* Enzymes
effect of simazine on, in corn, *Tweedy and Rics*, 280
intracellular localization of, in green leaf tissue, *Ritenour, Joy, Bunning, and Hageman*, 233
Nitrogen changes,
accompanying kinetin inhibition of growth in seedlings, *Banerji and Laloraya*, 623
Nitrogen fixation,
effects of sodium on, in *Anabaena cylindrica*, *Brownell and Nicholas*, 915
Nitrogen gas,
reduction of, by cell-free extracts of soybean root nodules, *Koch, Evans, and Russell*, 466
Nitrogen nutrition,
relation to ionic balance in tomato tissues, *Kirkby and Mengel*, 6
p-Nitrophenyl-phosphatase: *see* Enzymes
Nodulation factor,
purification of, from coconut water, *Schaffer and Alexander*, 563
Nodule formation,
stimulation of, in *Phaseolus vulgaris*, *Schaffer and Alexander*, 557
Nucleic acid(s),
changes in, associated with influence of purines and pyrimidines on cold hardiness, *Jung, Shih, and Shelton*, 1653
phosfon-S on metabolism of, *Brook, West, and Anthony*, 785
synthesis by excised radish cotyledons, *Nieman and Poulsen*, 946
Nyctinastic leaf movements,
phytochrome and, *Hillman and Koukkari*, 1413

— O —

Oat,
causal basis of gravity stimulus nullification in, *Dedolph, Oenick, Wilson, and Smith*, 1373
cellulose synthesis by cell-free system from, *Ordin and Hall*, 205
coleoptile, gravitational compensation, and phototropic response of, *Shen-Miller and Gordon*, 352
ion contents and cell transmembrane electropotentials of seedling tissues of, *Higinbotham, Etherton, and Foster*, 37
the enzyme system forming indoleacetic acid in, *Lantican and Muir*, 1158
Oat monolayers,
adsorption of aromatic acids to, *Brian*, 1209
Orchid blossoms,
ethylene and auxin in pollen-induced fading of, *Burg and Dijkman*, 1648
Organic acid(s),
compartmentation of exogenously supplied, in corn roots, *Steer and Beevers*, 1197
ion of, from barley roots treated anaerobically and with metabolic inhibitors, *Hiatt and Lowe*, 1731
relationship of cell sap pH to change of, during ion uptake, *Hiatt*, 294
specificity and localization of, in acid-induced ATP synthesis in chloroplasts, *Uribe and Jagendorf*, 697, 706
Orotidine-5′-phosphate decarboxylase: *see* Enzymes
Orotidine-5′-phosphate pyrophosphorylase: *see* Enzymes
Orthophosphate,
absorption by excised corn roots, temperature effects, *Carter and Lathwell*, 1407
Oryza sativa: *see* Rice
Oxazolidinethiones,
biosynthesis of, in rape, *Chisholm and Wetter*, 1726
Oxidative phosphorylation,
of mitochondria from NaCl-treated pea seedlings, *Livne and Levin*, 407
Oxygen,
and carbon dioxide in soil, interactive effects of, on growth of barley and peas, *Geisler*, 305
and hydrostatic pressure interaction on germination of lettuce seeds, *Vidaver and Lue-Kim*, 243
Oxygen concentration,
effects of, on respiratory intermediates in buckwheat seedlings, *Effer and Ranson*, 1053
Oxygen tension,
a determining factor in respiration of potato discs of varying thickness, *MacDonald*, 227
Ozone,
and anthocyanin formation in *Rumex crispus*, *Koukol and Dugger, Jr.*, 1023
inhibition of oxidative phosphorylation and respiration by, *Lee*, 691

— P —

^{32}P,
effect of x-rays on incorporation of, into photosynthetic products of *Ankistrodesmus braunii*, *Jeschke, Gimmler, and Simonis*, 380
Parasitism,
phosphate fractions in leaves of *Dendrophthoe falcata* and hosts, *Prakash, Krishnam, and Tewari*, 347
Parsley,
incorporation of methanol into pectic substance of, *Roberts, Shah, Golebiewski, and Loewus*, 1737
Patulin,
induction of light sensitive dormancy in lettuce by, *Berrie, Hendrie, Parker, and Knights*, 889
Pea,
ATPase activity and contractility associated with tendril coiling of, *Jaffe and Galston*, 845
auxin-gibberellin interaction in apical dominance in, *Scott, Case, and Jacobs*, 1329
biosynthesis of (—)-kaurene in cell-free starch of seeds of, *Anderson and Moore*, 1527
changes in protein synthesis induced by 3-indolylacetic acid in, *Patterson and Trewavas*, 1081

distribution of tocopherols and quinones in, *Gaunt and Stowe*, 851
effect of light on ethylene production and growth of plumules of, *Goeschl, Pratt, and Bonner*, 1077
effects of phosfon-S on nucleic acid metabolism in, *Brook, West, and Anthony*, 785
flavonoids and contact coiling in tendrils of, *Jaffe and Galston*, 848
gibberellin-auxin interaction in stem elongation, *Ockerse and Galston*, 47
inhibition of polar auxin transport by ethylene in stem of, *Burg and Burg*, 1224
inhibition of root growth of, by indole-3-acetic acid, *Chadwick and Burg*, 415
interactive effects of CO_2 and O_2 in soil on growth of, *Geisler*, 305
ion contents and cell transmembrane electropotentials of seedling tissues of, *Higinbotham, Etherton, and Foster*, 37
isoperoxidases of, *Siegel and Galston*, 221
light-induced inhibition of tryptophan decarboxylation in extracts of epicotyls, *Reed and Creccelius*, 1303
location of sulphite reductase in leaves of, *Mayer*, 324
metabolism of radioactive gibberellin A_1 by, *Kende*, 1612
3-methyleneoxindole reductase of, *Moyed and Williamson*, 510
modification of phytochrome synthesis in, by inhibitors and growth regulators, *Clarkson and Hillman*, 933
molecular requirements for ethylene activity in, *Burg and Burg*, 144
oxidation products of indole-3-acetic acid in seedlings of, *Tuli and Moyed*, 425
role of hydroxyproline-protein in cell elongation in, *Cleland and Karlsnes*, 669
seedlings, tissue respiration, and mitochondrial oxidative phosphorylation of NaCl-treated, *Livne and Levin*, 407
sodium and rubidium effluxes in roots, *Etherton*, 685
uptake and metabolism of α-tocopherol and vitamin K, by stem sections of, *Gaunt and Stowe*, 859

Pea buds,
phytochrome controlled ^{14}C-sucrose uptake into, *Goren and Galston*, 1087

Pea epicotyl,
RNA and cellulase synthesis in response to indoleacetic acid in, *Fan and Machlachlan*, 1114

Pea shoot tips,
biosynthesis of indoleacetic acid from tryptophan-^{14}C in cell-free extracts of, *Moore and Shaner*, 1787

Peanut,
acetaldehyde dehydrogenase from, *Oppenheim and Castelfranco*, 125
biogenesis of mitochondria in germinating cotyledons of, *Breidenbach, Castelfranco, and Criddle*, 1035
isolation and characterization of spherosomes from, *Jacks, Yatsu, and Altschul*, 585

Pear,
isolation of endogenous root-promoting factor from cuttings of, *Fadl and Hartmann*, 541

Pectic substance,
incorporation of methanol into, *Roberts, Shah, Golebiewski, and Loewus*, 1737

Penicillium notatum,
growth of salt-habituated in salt-free media, *Siegel, Roberts, Lederman, and Daly*, 201
growth of salt-tolerant, in boron-rich media, *Roberts and Siegel*, 1215

Peppermint,
effect of light and temperature on monoterpenes of, *Burbott and Loomis*, 20

Periodicity,
of exudation of detopped tobacco, *Wallace, Ashcroft, and Lunt*, 238

Perithecial development,
effects of antimetabolites and inhibitors on, in *Sordaria fimicola*, *Lindenmayer and Schoen*, 1059

Permeability,
effect of ethylene on, of cantaloupe tissue, *Von Abrams and Pratt*, 299

Peroxidase,
associated with plant mitochondria, *Plesnicar, Bonner, Jr., and Storey*, 366

Peroxyacetyl nitrate,
inhibition of cyclic photophosphorylation by, *Koukol, Dugger, Jr., and Palmer*, 1419

Persea gratissima: see Avocado

Petroselinum crispum: see Parsley

Petroselinum crispum,
biosynthesis of apiose in, *Roberts, Shah, and Loewus*, 659

pH, tissue,
changes in, associated with influence of purines and pyrimidines on cold hardiness, *Jung, Shih, and Shelton*, 1653

Pharbitis nil,
distribution of auxin protector substances in, *Yoneda and Stonier*, 1017

Phaseolus aureus: see Mung bean

Phaseolus coccineus,
translocation in seedlings of, *Whitehouse and Zalik*, 1363

Phaseolus vulgaris: see also Bean
measurements of phytochrome in vivo and correlation with photomorphogenic responses in, *Klein, Edwards, and Shropshire, Jr.*, 264

Phenol,
inhibition of photo-induced electron transport in chloroplasts by, *Neumann and Drechsler*, 573

Phenolic compounds,
biosynthesis of, in *Sorghum vulgare*, *Stafford*, 450

Phleomycin,
germination of excised *Fraxinus ornus* embryos with, *Tepper, Hollis, Galson, and Sondheimer*, 1493

Phormidium luridum,
metabolically active protoplasts from, *Biggins*, 1442
photosynthetic reactions by preparations from, *Biggins*, 1447

Phosfon-S,
effects on nucleic acid metabolism, *Brook, West, and Anthony*, 785

Phosphate,
in leaves of *Dendrophthoe falcata* and hosts, *Prakash, Krishnam, and Tewari*, 347

Phosphoribulokinase: *see* Enzymes

Phosphorylation,
during respiratory climacteric in avocado fruit slices, *Young and Biale*, 1357
Phosphorylation, oxidative,
inhibition by ozone, *Lee*, 691
Photomorphogenic responses,
correlation of, with measurements of phytochrome in vivo, in *Phaseolus, Klein, Edwards, and Shropshire, Jr.*, 264
Photoperiod,
and cold hardiness inhibitors, *Irving and Lanphear*, 1384
Photophosphorylation,
by a mutant deficient in P700, *Givan and Levine*, 1264
technique for isolating chloroplasts with high rates of, *Nobel*, 1389
uncoupling by freezing, *Heber*, 1343
Photophosphorylation, cyclic,
inhibitory effects of peroxyacetyl nitrate on, *Koukol, Dugger, Jr., and Palmer*, 1419
Photosynthesis,
detecting impaired, by increased fluorescence, *Bennoun and Levine*, 1284
early effects of illumination on the activity of some photosynthetic enzymes, *Chen, McMahon, and Bogorad*, 1
enhanced dark CO_2 fixation by preilluminated *Chlorella* and *Anacystis, Tokasaki and Gibbs*, 991
enhancement of, by altered light beams, *Eley and Myers*, 598
in *Cercidium floridum;* distribution of ^{14}C from $^{14}CO_2$, *Adams, Strain, and Ting*, 1797
in *Rhodospirillum rubrum, Anderson and Fuller*, 487, 491, 497
in silicon-starvation synchrony of *Navicula pelliculosa, Coombs, Spanis, and Volcani*, 1607
kinetics of daily rate of, at low temperature for two conifers, *Pharis, Hellmers, Schuurmans*, 525
of cotton plants under varying water potentials, *Pallas, Michel, and Harris*, 76
sucrose as a product of, in isolated chloroplasts, *Everson, Cockburn, and Gibbs*, 840
Photosynthetic activity,
and α-linolenate in *Chlorella protothecoides, Katayama and Benson*, 308
Photosynthetic competence,
and chlorophyll formation in *Euglena* in presence of DCMU during chloroplast development, *Schiff, Zeldin, and Rubman*, 1716
Photosynthetic products,
incorporation of ^{32}P and ^{14}C into, of *Ankistrodesmus braunii* as affected by x-rays, *Jeschke, Gimmler, and Simonis*, 380
Photosynthetic reactions,
in preparations from *Phormidium luridum, Biggins*, 1447
of chloroplasts with unusual structures, *Homann and Schmid*, 1619
Phototropic response,
and gravitational compensation of oat coleoptile, *Shen-Miller and Gordon*, 352
Phytochrome,
changes of P_{FR} requirement for germination of tomato seeds, *Yaniv and Mancinelli*, 1147
controlled ^{14}C-sucrose uptake: effect of gibberellic acid, *Goren and Galston*, 1087
from *Mesotaenium* and *Sphaerocarpos, Taylor and Bonner*, 762
high levels of, in cultured tissue of wild carrot, *Wetherell and Koukkari*, 302
in nyctinastic leaf movements of *Albizzia julibrissin, Hillman and Koukkari*, 1413
prolonged far red irradiation on germination of seeds, *Yaniv, Mancinelli, and Smith*, 1479
spectrophotometric measurements of, in vivo and correlation with photomorphogenic responses of *Phaseolus, Klein, Edwards, and Shropshire, Jr.*, 264
temperature dependence and P_{FR} levels in germination of tomato, *Mancinelli, Yaniv, and Smith*, 333
Phytochrome synthesis,
modification by inhibitors and growth regulators in pea, *Clarkson and Hillman*, 933
Pinus elliottii,
interionic relationships in seedlings of, *Dumbroff and Michel*, 1465
Pinus ponderosa,
kinetin of daily rate of photosynthesis in, *Pharis, Hellmers, and Schuurmans*, 525
Pisum sativum: see Pea
Pinus taeda: see Loblolly pine
Plastic films,
permeabilities of, to water and carbon dioxide, *Woolley*, 641
Plastids,
in vitro protein synthesis in developing bean, *Parenti and Margulies*, 1179
Plastoquinone,
distribution of, in plant species, *Barr and Crane*, 1255
Plastoquinones A, B, C, and D,
analysis for, from chloroplasts, *Barr, Henninger, and Crane*, 1246
Polar transport,
related to mobilization of plant constituents, *Zaerr and Mitchell*, 863
Pollen-induced fading,
of orchid blossoms, ethylene and auxin in, *Burg and Dijkman*, 1648
Polysaccharide, alkali-insoluble,
biosynthesis of, from UDP-D-glucose with particulate enzyme preparations, *Villemez, Jr., Franz, and Hassid*, 1219
Polysaccharide, phytotoxic,
purification and properties of, from *Corynebacterium sepedonicum, Strobel*, 1433
Potassium,
absorption in corn roots, calcium inhibition of, *Elzam and Hodges*, 1483
accumulation by *Chlorella pyrenoidosa, Schaedle and Jacobson*, 953
activated adenosine triphosphatase in loblolly pine roots, *McClurkin and McClurkin*, 1103
ion of, from barley roots treated anaerobically and with metabolic inhibitors, *Hiatt and Lowe*, 1731
Potato,
development of fatty acid synthetase as function of protein synthesis in aging tuber slices of, *Willemot and Stumpf*, 391
invertase inhibitor from, *Pressey*, 1780
oxygen tension on respiration of discs of, *MacDonald*, 227

soluble amylopectin-like polysaccharide in tubers of, *Frydman and Cardini*, 628
Proserpinaca palustris,
leaf development and flowering in, *Davis*, 667
Protease: *see* Enzymes
Protein(s),
changes in, associated with influence of purines and pyridines on cold hardiness, *Jung, Shih, and Shelton*, 1653
effect of light and gibberellic acid on, in lettuce seeds, *Rai and Laloraya*, 440
soluble, as related to cold hardiness, in alfalfa, *Gerloff, Stahmann, and Smith*, 895
synthesis by developing bean plastids in vitro, *Parenti and Margulies*, 1179
synthesis by excised radish cotyledons, *Nieman and Poulsen*, 946
UV-induced alteration of metabolism of, modifying abscission, *Klein and Edsall*, 461
Protein amino acids,
biosynthesis of, in rose tissue culture, *Dougall and Fulton*, 941
Protein bodies,
of soybean, *Tombs*, 797
Protein synthesis,
activation of, by microsomes from aging beet disks, *Ellis and MacDonald*, 1297
and fatty acid synthetase in aging potato tuber slices, *Willemot and Stumpf*, 391
by Jerusalem artichoke tuber discs and cell-free preparations, *Chapman and Edelman*, 1104
changes in, induced by 3-indolylacetic acid, *Patterson and Trewavas*, 1081
effect of water and salt stresses on, in tobacco leaves, *Ben-Zioni, Itai, and Vaadia*, 361
kinetin and auxin action on, in bean endocarp, *Sacher*, 1334
Proteinase: *see* Enzymes
Protochlorophyllide,
regeneration after illumination in bean leaves, *Gassman and Bogorad*, 781
Protoplasts,
preparation of active, from *Phormidium luridum*, *Biggins*, 1442
Prunus cerasus,
metabolic changes in after-ripening seed of, *LaCroix and Jaswal*, 479
Pseudotsuga menziesii,
kinetin of daily rate of photosynthesis in, *Pharis, Hellmers, and Schuurmans*, 525
Puccinia graminis tritici uredospores,
carbohydrate and lipid metabolism during germination of, *Daly, Knoche, and Wiese*, 1633
Purines,
influence on cold hardiness: changes in soluble protein, nucleic acid, and tissue pH, *Jung, Shih, and Shelton*, 1653
Pyrimidines,
influence on cold hardiness: changes in soluble protein, nucleic acid, and tissue pH, *Jung, Shih, and Shelton*, 1653
Pyruvate,
oxidation of, by mitochondria of avocado fruit during climacteric cycle, *Lance, Hobson, Young, and Biale*, 471

— Q —

Quinones,
distribution in pea plant, *Gaunt and Stowe*, 851

— R —

Radioactive gibberellin A_1,
preparation of, and metabolism in pea, *Kende*, 1612
Radiocalcium,
polar transport of, in corn root segments, *Vaughan, Evans, and Hutchin*, 747
Radiostrontium,
polar transport of, in corn root segments, *Vaughan, Evans, and Hutchin*, 747
Radish cotyledons,
synthesis of nucleic acid and protein by, *Nieman and Poulsen*, 946
Rape,
biosynthesis of some isothiocyanates and oxazolidinethiones in, *Chisholm and Wetter*, 1726
Raphanus sativus: *see* Radish
Red light,
and far-red light on lipoxidase of squash seedlings, *Surrey*, 421
photosynthesis by algae in, *Hess and Tolbert*, 1123
Reductive pentose phosphate cycle,
control of, in *Rhodospirillum rubrum*, *Anderson and Fuller*, 497
Relatedness among plants,
as measured by DNA hybridization, *Bendich and Bolton* 959
Reradiation,
and heat transfer from plants, *Idso and Baker*, 631
Respiration,
changes in after-ripening seed of *Prunus cerasus*, *LaCroix and Jaswal*, 479
during imbibition and subsequent seedling growth in *Zea mays*, *Woodstock and Grabe*, 1071
effects of inhibitors on, of mitochondria, *Ikuma and Bonner, Jr.*, 1400
in buckwheat seedlings, *Effer and Ranson*, 1042
in silicon-starvation synchrony of *Naviculla pelliculosa*, *Coombs, Spanis, and Volcani*, 1607
inhibition by ozone, *Lee*, 691
of NaCl-treated pea seedlings, *Livne and Levin*, 407
of potato discs, effect of oxygen tension, *MacDonald*, 227
patterns of bean fruits, *Watada and Morris*, 757
Respiratory climacteric,
in avocado fruit slices, phosphorylation during, *Young and Biale*, 1357
Respiratory enhancement,
action spectrum for, in *Chlorella*, *Kowallik*, 672
Respiratory enzymes,
relative activities of, from *Verticillium albo-atrum*, conidia, *Throneberry*, 1472
Respiratory inhibitors,
effects of, on mung bean mitochondria, *Ikuma and Bonner, Jr.*, 1535
Respiratory intermediates,
effects of oxygen concentration on levels of, in buckwheat seedlings, *Effer and Ranson*, 1053
Rhodospirillum rubrum,
photosynthesis in, *Anderson and Fuller*, 487, 491, 497

Rhythm, endogenous,
in photoperiodic response of *Hyoscyamus niger*, *Hsu and Hamner*, 725
Ribonuclease,
activity in stressed tomato leaflets, *Dove*, 1176
gibberellic-acid enhanced synthesis and release of, by isolated barley aleurone layers, *Chrispeels and Varner*, 398
Ribonucleotide,
dependency of growth of *Penicillium notatum* on, *Siegel, Roberts, Lederman, and Daly*, 201
Ribosomes,
changes during senescence of barley leaf, *Srivastava and Arglebe*, 1497
Ribosome, chloroplastic,
formation, inhibition by 3-amino-1,2,4-triazole of, *Bartels, Matsuda, Siegel, and Weier*, 736
Ribulose-1,5-diP carboxylase: *see* Enzymes
Rice,
metabolic poisons on germination of, *Siegel, Lederman, Daly, and Roberts*, 1489
Ricinus communis: see Castor bean
RNA,
effect of N-bases and boron on, of tomato root tips, *Johnson and Albert*, 1307
role of synthesis of, in abscission, *Holm and Abeles*, 1094
synthesis in pea epicotyl in response to indoleacetic acid, *Fan and Maclachlan*, 1114
UV-induced alteration of metabolism of, modifying abscission, *Klein and Edsall*, 461
RNA fraction,
nature of an, from higher plants, *Hock*, 1149
RNA metabolism,
during chloroplast development in *Euglena gracilis*, *Zeldin and Schiff*, 922
RNA synthesis,
kinetin and auxin action on, in bean endocarp, *Sacher*, 1334
inhibition of, by actinomycin D, *Coartney, Morre, and Key*, 434
Root exudate,
cytokinin activity in, of *Vitis vinifera*, *Skene and Kerridge*, 1131
Root growth,
inhibition of, by indole-3-acetic acid, *Chadwick and Burg*, 415
Root-promoting factor,
in pear cuttings, *Fadl and Hartmann*, 541
Rose tissue culture,
biosynthesis of arginine in, *Dougall and Fulton*, 387
biosynthesis of protein amino acids in, *Dougall and Fulton*, 941
Rotation axes,
for analysis of gravity effects, *Lyon*, 875
Rubidium,
accumulation by *Chlorella pyrenoidosa*, *Schaedle and Jacobson*, 953
as a nutrient for sugar beet, *El-Sheikh, Ulrich, and Broyer*, 1202
effluxes in pea roots, *Etherton*, 685
Rumex crispus,
anthocyanin formation in, in response to ozone and smog treatment, *Koukol and Dugger, Jr.*, 1023

— S —

Saccharum officinarum: see Sugarcane
Salt,
radial transport of, in corn roots, *Yu and Kramer*, 985
Salt stress,
and water stress and kinetin effect on protein synthesis in tobacco leaves, *Ben-Zioni, Itai, and Vaadia*, 361
Schizophyllum commune,
indole-3-acetic acid in, *Epstein and Miles*, 911
Seed germination,
prolonged far red irradiation, *Yaniv, Mancinelli, and Smith*, 1479
Senescence,
kinetin and auxin on RNA and protein synthesis during, *Sacher*, 1334
regulation of, in bean leaf discs by light and chemical growth regulators, *Goldthwaite and Laetsch*, 1757
ribosomes from barley leaves during, *Srivastava and Arglebe*, 1497
Serine transhydroxymethylase: *see* Enzymes
Setaria faberii: see Foxtail
Silicon-starvation synchrony,
composition of *Navicula pelliculosa*, *Coombs, Darley, Holm-Hansen, and Volcani*, 1601
photosynthesis and respiration of *Navicula pelliculosa*, *Coombs, Spanis, and Volcani*, 1607
Simazine,
effect on nitrate reductase activity in corn, *Tweedy and Ries*, 280
Smog treatment,
and anthocyanin formation in *Rumex crispus*, *Koukol and Dugger, Jr.*, 1023
Sodium,
absorption and translocation of, in bean and cotton, *Pearson*, 1171
absorption by barley roots: mechanisms of transport, *Rains and Epstein*, 314, 319
accumulation by *Chlorella pyrenoidosa*, *Schaedle and Jacobson*, 953
activated adenosine triphosphatase in loblolly pine roots, *McClurkin and McClurkin*, 1103
as a nutrient for sugar beet, *El-Sheikh, Ulrich, and Broyer*, 1202
effects on nitrate assimilation and nitrogen fixation in *Anabaena cylindrica*, *Brownell and Nicholas*, 915
effluxes in pea roots, *Etherton*, 685
Sodium chloride,
treatment of pea seedlings, effect upon respiration and oxidative phosphorylation, *Livne and Levin*, 407
Soil temperature,
and transpiration, *Cox and Boersma*, 550
Soil water stress,
and transpiration, *Cox and Boersma*, 550
Solanum tuberosum: see Potato
Soluble nitrogen,
effect of light and gibberellic acid on, in lettuce seeds, *Rai and Laloraya*, 440
Sordaria fimicola,
effects of antimetabolites and inhibitors on growth of, *Lindenmayer and Schoen*, 1059
Sorghum vulgare,
biosynthesis of lignin in first internodes of, *Stafford*, 450

Soybean,
floral inhibition of, during a 72-hour cycle, *Shumate, Reid, and Hamner*, 1511
inactive and protein precursor pools of amino acids in, *Holleman and Key*, 29
protein bodies of, *Tombs*, 797
Soybean roots,
localization of calcium-mediated apparent ion selectivity in corn-sectional volume of, *Leggett and Gilbert*, 1658
Soybean root nodules,
reduction of acetylene and nitrogen gas by breis and cell-free extracts of, *Koch, Evans, and Russell*, 466
Sphaerocarpos donnellii,
isolation of phytochrome from, *Taylor and Bonner*, 762
Spherosomes,
isolation and characterization of, from peanuts, *Jacks, Yatsu, and Altschul*, 585
Spinach,
location of sulphite reductase in leaves of, *Mayer*, 324
Squash,
effect of red and far-red light on lipoxidase of seedlings of, *Surrey*, 421
hormonal control of proteinase activity in, *Penner and Ashton*, 791
Starch,
biosynthesis of, in chloroplasts, *Nomura, Nakayama, Murata, and Akazawa*, 327
Steroids,
time course of biosynthesis and metabolism in *Haplopappus heterophyllus*, *Bennett, Lieber, and Heftmann*, 973
Sterols,
in *Chlorella vulgaris*, *Patterson*, 1457
Stomatal activity,
of cotton plants under varying water potentials, *Pallas, Michel, and Harris*, 76
Strontium,
and calcium transport rates in maize roots, *Hutchin and Vaughan*, 644
Sucrose,
a photosynthetic product in isolated chloroplasts, *Everson, Cockburn, and Gibbs*, 480
low temperature inhibition of translocation of, in sugar beet, *Swanson and Geiger*, 751,
Sugar(s),
translocation of, effects of temperature change, *Webb*, 881
uptake and translocation in the castor bean seedling, *Kriedemann and Beevers*, 161, 174
Sugar beet,
low temperature inhibition of sucrose translocation in, *Swanson and Geiger*, 751
sodium and rubidium as nutrients for, *El-Sheikh, Ulrich, and Broyer*, 1202
translocation of ^{14}C-sucrose in, in darkness, *Geiger and Batey*, 1743
Sugarcane,
effect of water supply upon translocation of ^{14}C in, *Hartt*, 338
translocation of ^{14}C in, during day and night, *Hartt and Kortschak*, 89
Sulphite reductase: *see* Enzymes
Sunflower,
effects of light and substrates on allagochrome and chlorogenic acid levels in inactivated leaf discs of, *Habermann*, 1769

— T —

Temperature,
and light interaction in chlorophyll synthesis in corn, *McWilliam and Naylor*, 1711
effect on enzymes affecting Crassulacean acid metabolism, *Brandon*, 977
effect on monoterpenes of peppermint, *Burbott and Loomis*, 20
of *Vitis vinifera* root: effect on cytokinin activity of exudate, *Skene and Kerridge*, 1131
upon translocation of sugars, *Webb*, 881
Temperature, super-low,
effects of cooling and rewarming rates on survival of cortical cells, *Sakai and Yoshida*, 1695
electron microscope study of ice in cortical cells cooled rapidly, *Sakai and Otsuka*, 1680
Tendril coiling,
and flavonoids, *Jaffe and Galston*, 848
ATPase and contractility associated with, *Jaffe and Galston*, 845
Teratoma,
induction in tobacco by debudding, *Skok*, 767
Thermal conductivity,
of citrus tree wood, *Turrell, Austin, McNee, and Park*, 1025
Thymidine,
utilization, effect of 2-deoxyadenosine on, *Takats*, 907
Thymidine-^{3}H,
incorporation into nuclear DNA of leaf cells, *Maksymowych, Devlin, Blum, and Wochok*, 814
Tissue culture,
of wild carrot, high phytochrome levels in, *Wetherell and Koukkari*, 302
Tobacco,
exudation of detopped, day-night periodicity of, *Wallace, Ashcroft, and Lunt*, 238
high activity of glycolic acid oxidase system in leaves of, *Moss*, 1463
phytosynthetic reactions of chloroplasts with unusual structure from, *Homann and Schmid*, 1619
synthesis of indoleacetic acid by a cell-free system from, *Phelps and Sequeira*, 1161
tumor and teratoma induction in, by debudding, *Skok*, 767
water and salt stress and kinetin effect on protein synthesis in leaves of, *Ben-Zioni, Itai, and Vaadia*, 361
α-Tocopherol,
uptake and metabolism of, by pea stem sections, *Gaunt and Stowe*, 859
Tocopherols,
distribution in pea plant, *Gaunt and Stowe*, 851
Tomato,
changes of P_{FR} requirement for germination of seeds of, *Yaniv and Mancinelli*, 1147
ionic balance in relation to nitrogen nutrition in tissues of, *Kirkby and Mengel*, 6
prolonged far red irradiation on germination of seed of, *Yaniv, Mancinelli, and Smith*, 1479
ribonuclease activity in stressed leaflets of, *Dove*, 1176

root tips, effect of N-bases and boron on, *Johnson and Albert*, 1307
structure and function of chloroplasts during ammonium toxicity, *Puritch and Barker*, 1229
temperature dependence and P_{FR} levels in germination of, *Mancinelli, Yaniv, and Smith*, 333
translocation of Mn, Fe, Co, and Zn in, *Tiffin*, 1427

Tradescantia paludosa,
pollen grains, effect of 2-deoxyadenosine on thymidine utilization by, *Takats*, 907

Translocation,
and phloem water relations, *Kaufmann and Kramer*, 191
effect of temperature change in, of sugars, *Webb*, 881
of ^{14}C in sugarcane, effect of moisture supply upon, *Hartt*, 338
of ^{14}C in sugarcane plant during day and night, *Hartt and Kortschak*, 89
of ^{14}C-sucrose in sugar beet in darkness, *Geiger and Batey*, 1743
of foliar-applied iron, *Eddings and Brown*, 15
of indole-3-acetic acid-1'-^{14}C and tryptophan-1-^{14}C in seedlings, *Whitehouse and Zalik*, 1363
of Mn, Fe, Co. and Zn in tomato, *Tiffin*, 1427
of radioactive kinetin, *Lagerstedt and Langstrom*, 611
of sodium in bean and cotton, *Pearson*, 1171
of sucrose, low temperature inhibition of, *Swanson and Geiger*, 751
of sugar in castor bean seedling, *Kriedemann and Beevers*, 161, 174

Transmembrane electropotentials,
ion content and, of pea and oat seedling tissue, *Higinbotham, Etherton, and Foster*, 37

Transpiration,
and heat transfer in plants, *Idso and Baker*, 631
as a function of soil temperature and water stress, *Cox and Boersma*, 550
of cotton plants under varying water potentials, *Pallas, Michel, and Harris*, 76
rates from leaves in situ within the vegetative canopy of a corn crop, *Impens, Stewart, Allen, Jr., and Lemon*, 99

Transport,
of indoleacetic acid-2-^{14}C, influence of light on, *Naqvi and Gordon*, 138
polar, of radiostrontium and radiocalcium in corn root segments, *Vaughan, Evans, and Hutchin*, 747
radial, of salt in corn roots, *Yu and Kramer*, 985

Tricarboxylic acid cycle,
control of, in *Rhodospirilium rubrum*, *Anderson and Fuller*, 497

2,4,5-Trichlorophenoxyacetic acid,
degradation of, in woody plants, *Fitzgerald, Brown, and Beck*, 459

Trifolium repens,
transpiration, soil temperature, and water stress in, *Cox and Boersma*, 550

Triphenyl tetrazolium chloride method,
for determining cold injury, refinement of, *Steponkus and Lanphear*, 1423

Triticum vulgare: see Wheat

Tryptamine,
involvement in indoleacetic acid synthesis, *Phelps and Sequeira*, 1161

Tryptophan-^{14}C,
biosynthesis of indoleacetic acid from, in cell-free extracts of pea shoot tips, *Moore and Shaner*, 1787

Tryptophan-1-^{14}C,
translocation in seedlings of *Phaseolus coccineus* and *Zea mays*, *Whitehouse and Zalik*, 1363

Tryptophan decarboxylation,
light-induced inhibition of, in extracts of pea epicotyls, *Reed and Crecelius*, 1303

Tsuga canadensis: see Hemlock

Tumor,
induction in tobacco by debudding, *Skok*, 767

— U —

UDP-D-glucose,
production of alkali-insoluble polysaccharide from, by particulate enzyme preparation, *Villemez, Jr., Franz, and Hassid*, 1219

Uncouplers,
on ion absorption and transport in maize seedlings, *Luttge and Laties*, 181

Uncoupling,
of energy-linked functions of corn mitochondria by linoleic acid and monomethyldecenylsuccinic acid, *Baddeley and Hanson*, 1702

Uptake,
of sugar in castor bean seedling, *Kriedemann and Beevers*, 161, 174

— V —

Vanda Petamboeran: see Orchid blossoms
Vanda Rose Marie: see Orchid blossoms
Verticillium albo-atrum,
activities of respiratory enzymes from conidia of, *Throneberry*, 1472
Viburnum plicatum tomentosum,
control of cold hardiness in, *Irving and Lanphear*, 1191
Vine: *see Vitis vinifera*
Vitamin K,
uptake and metabolism of, by pea stem sections, *Gaunt and Stowe*, 859
Vitis vinifera,
root temperature and cytokinin activity of root exudate of, *Skene and Kerridge*, 1131

— W —

Water permeability,
of plastic films, *Woolley*, 641

Water potential,
photosynthesis, transpiration, leaf temperature, and stomatal activity in cotton plants under varying, *Pallas, Michel, and Harris*, 76

Water relation,
of phloem and translocation, *Kaufmann and Kramer*, 191

Water stress,
and salt stress and kinetin effect on protein synthesis in tobacco leaves, *Ben-Zioni, Itai, and Vaadia*, 361

Water supply,
effect of, upon translocation and storage of ^{14}C in sugarcane, *Hartt*, 338
Watermelon,
nature of a rapidly labelled RNA fraction from, *Hock*, 1149
Wheat,
chloroplastic ribosome formation in, inhibition by 3-amino-1,2,4-triazole, *Bartels, Matsuda, Siegel, and Weier*, 736

— X —

Xanthium pensylvanicum: see Cocklebur
X-rays,
effect on incorporation of ^{32}P and ^{14}C in photosynthetic products of *Ankistrodesmus braunii, Jeschke, Gimmler, and Simonis*, 380
Xylem,
freezing of sap without cavitation, *Hammel*, 55

— Z —

Zea mays: see also Corn *and* Maize
S-adenosyl-L-methionine-magnesium protoporphyrin methyltransferase in, *Radmer and Bogorad*, 463
calcium and strontium transport rates in segments of roots of, *Hutchin and Vaughan*, 644
carbon dioxide production by dry grain of, *Bartholomew and Loomis*, 120
in vitro autolysis of cell walls of, *Lee, Kivilaan, and Bandurski*, 968
light on transport of indoleacetic-2-^{14}C in, *Naqvi and Gordon*, 138
relationship between respiration during imbibition and subsequent seedling growth in, *Woodstock and Grabe*, 1071
translocation in seedlings of, *Whitehouse and Zalik*, 1363
Zea mays coleoptiles,
geotropic response of, under anaerobic conditions, *Wilkins and Shaw*, 1111
Zinc,
translocation in tomato, *Tiffin*, 1427
